OTHER INGREDIENTS: Natural Flavors, Citric Acid, Erythritol, Stevia Leaf Extract, Silicon Dioxide, Vegetable Juice (color).

WARNING: For those 18 and older. Check with healthcare professional before using product if pregnant or nursing.

SUSTAINED FOCUSED ENERGY VS. A SHORT BLAST OF JITTERS

Many popular energy drinks either spike your blood sugar levels or overstimulate your adrenal glands in order to release high levels of fight-or-flight hormones. Focus provides fast-acting, gentle, and sustained energy. People want focused energy, not jittery energy followed by a crash.

THE SCIENCE-BASED SOLUTION

Alovéa’s FOCUS proprietary formula represents a “Best in Class” nutritional solution to help people feel better, look better, and perform at their very best.* Our innovative formula uses these great ingredients, in the right amounts:

Choline - An essential nutrient that serves as the biochemical building block for acetylcholine, a critical neurotransmitter that helps enhance mental performance.

L-theanine - An amino acid that is similar to glutamate, an excitatory neurotransmitter. L-theanine also supports brain dopamine levels, helping to provide a relaxed, focused effect.

L-tyrosine - A key amino acid that supports brain dopamine production, which is known to enhance mental focus and motivation.

Fermented whole food-sourced vitamins and a patented new **CoQ10** extract, designed for maximum absorption, and to enhance the production of clean energy at the cellular level.

Supercharged with our exclusive Alovéa AE™ Acemannan Extract that contains the industry’s highest percentage of the immune-activating fractions of Acemannan. A strong immune system helps the body direct energy to other critical organs like the brain.

All-natural sweeteners include stevia, monkfruit, and **Palatinose™** isomaltulose, a unique plant-based, low glycemic carbohydrate that provides a sustained release of energy without the unpleasant aftertaste of other sweeteners or the harmful effects of artificial sweeteners. Palatinose™ has a low glycemic index, while maltodextrin, commonly used in energy drink powders, has a very high glycemic index.

Every Alovéa product purchased helps to nourish children in need through our Buy 1, Nourish 7™ giving initiative. For details, visit us online at alovea.com/hopemovement
